NextVen

Transforming assets into value.

An integrated energy and infrastructure company. We design, develop, recover, operate, and optimize industrial and energy assets across their full lifecycle.

Binational structure **Venezuela — Houston, TX**

01 • EXECUTIVE SUMMARY

One partner for the asset's entire lifecycle.

- NextVen is an **integrated energy and infrastructure company** that stays with its clients through the full lifecycle of their industrial and energy assets.
- We deliver solutions from **project conception** through **asset recovery, optimization, and decommissioning**.
- Our integrated approach drives **Venezuela's economic recovery** and sustainable growth across Latin America.

WHERE WE COME FROM

Our team came up through Venezuela's oil industry —offshore, Lake Maracaibo, onshore fields, José and El Tablazo— and took that training into LNG projects and offshore developments abroad.

That track record now returns to Venezuela.

“We stand with our clients at every stage of their investment's lifecycle.”

02 · VISION AND MISSION

Where we are headed.

Vision

To be the leading company in integrated energy, infrastructure, and asset management services, recognized for turning industrial assets into **sustainable value**.

Mission

To develop, recover, operate, and optimize assets through **innovative, safe, and sustainable** solutions that increase our clients' competitiveness.

03 · VALUE PROPOSITION

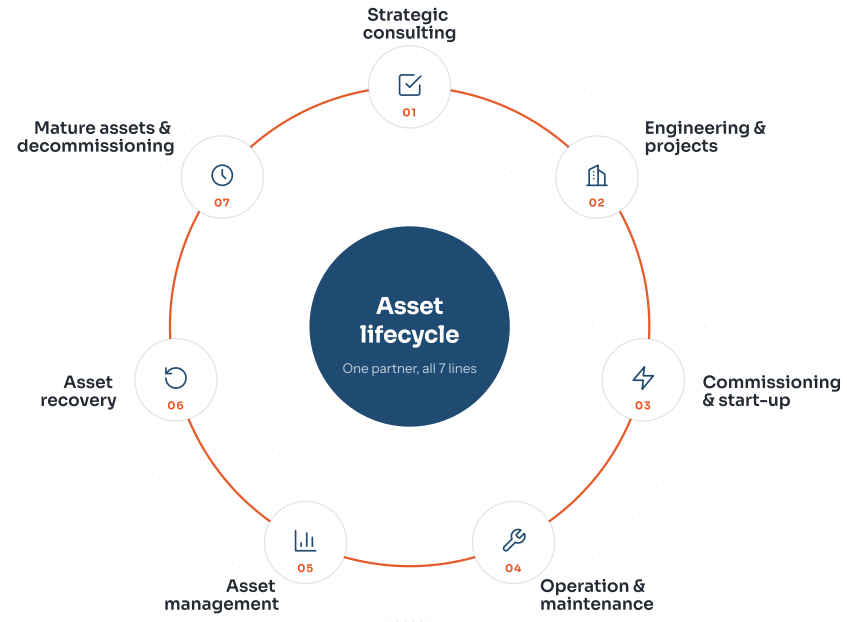

NextVen brings together in one organization:

01 Strategic consulting	02 Engineering and project development	03 Construction and execution
04 Commissioning and start-up	05 Operation and maintenance	06 Asset management
07 Infrastructure recovery	08 Performance optimization	09 Decommissioning and reuse

“One strategic partner for the entire asset lifecycle.”

04 · INTEGRATED BUSINESS MODEL

Seven business lines, one cycle.

Decommissioning and reuse return the asset to the start of the cycle: circular economy.

— 05 · LINE 01

Strategic Consulting and Advisory

Supporting technical, financial, and strategic investment decisions.

SERVICES

Feasibility studies

Due diligence

Economic evaluations
